

## 2017 Spring

### **Please give suggestions for future speakers, topics or sites.**

Acne Sports topics

As already noted, would rather not be in downtown Jackson

Geriatric Med

infectious diseases

more dermatology and psychiatry

More dermatology and psychiatry

more musculoskeletal topics

More on Government (CMS) regulations and potential legislation relative to Health/Medical care

Natchez, Biloxi, Greenwood, Memphis, Oxford again, Tupelo, Hattiesburg

No Comment

Peripheral Arterial Disease ( Dr. John Wescott -@UMMC) Lab: How to take an ankle blood pressure; the CORRECT way to take an arm blood pressure. (Debbie Minor, PharmD) More Diabetes More HTN Review of antibiotics (old and new) (esp. since now there is resistance) (maybe Skip Nolan?)  
update on political topics and national news - can be short updates Maybe a quick updates hour where 3 people have 20 minutes to talk about updates with things. Could be topic, medication, political, etc specific. Quick fire change of pace lecture.

Wilson Parry could speak on managing elevated kidney function John Norton could give a psyche med update

Would be great to have Dr. Jacob Graham and Dr. Adelaide Hebert return to give presentation on different topics in their respective fields. Sports Medicine topics are very helpful. A practice management breakout session with a panel and/or discussion board might be helpful. Pain management and prescribing topics that could be counted toward CME requirements for those with a DEA number would be most helpful.  
Would love to see topics regarding how to make your clinic flow well- suggestions, what other physicians have found works well for them, etc.

### **Please give suggestions for improving future meetings (e.g. concerning techniques, materials, procedures, activities).**

Slides may be given to participants on a jump drive

ACLS certification

Better acoustics

Easy when it was located in Madison. Downtown Jackson is not very convenient.

I like the current time set up.

If printed slides are offered they should be in a font that is easily readable .

joint injection workshop

Joint injections

liked the small group breakouts - would like one on using hand held ultrasound

Location could be better.

more hands on procedure workshops

More Newstage plays.

no change

No Comment

none

Overall. Good no major changes

powerpoints for every presentation so we can take notes on them.

Prefer Friday afternoon, Saturday morning, Sunday morning format with optional Saturday pm sessions.

Weekends are good

Would rather see if moved somewhere other than downtown
